

The **Coronavirus CivActs Campaign (CCC)** gathers rumours, concerns and questions from communities across Nepal to eliminate information gaps between the government, media, NGOs and citizens. By providing the public with facts, the CCC ensures a better understanding of needs regarding the coronavirus and debunks rumours before they can do more harm.

## Is the human resource mobilized in corona prevention control and treatment enough?

**67591**  
mobilized health  
workers

If we see the statistics, we can assume that **1 in every 47 individuals** staying in quarantine have been infected with coronavirus. Considering this ratio, if the number of people staying in isolation will reach **10 thousand**, the number in quarantine will reach **4,68,751**. Thus, it can be observed here that **each health worker has to take care of 7 people**. So, will the available human resources be enough if the transmission increases in the current rate?

# Rumors & Facts

Currently, the food products distributed locally are of poor quality. Where should we report?

In the present context, if there is any complaint regarding the quality of food in sale or relief distribution, the general consumer can inform the complaint to the Department of Food and Technology or its subordinate offices. Please open the link below for detailed contact details.

While the social distancing is being practiced everywhere else, what is the situation of prison? Is there any monitoring mechanism or not?

Is the social distance of 3 feet as per the criteria set by the World Health Organization being maintained or not? Is the criteria of Nepal Government about not allowing to gather more than 25 people being followed or not? Are the new prisoners kept separately or not? The Attorney General's office has determined a checklist for monitoring.

Does the CIAA look into the government budget spent in corona?

Whether or not the complaint is received, there is a legal provision for the Commission for the Investigation for Abuse of Authority to investigate the government expenditure in the name of corona prevention and control. The CIA can investigate on the basis of the information or news covered in the media. As per the Commission for the Investigation of Abuse and Authority Act and Prevention of Corruption Act, the CIA can investigate and file a case in special court.

Why is the result of the PCR test of COVID-19 being delayed in Karnali Province?

The high number of swab collection in local level but the inadequate testing capacity in province level has caused the delay in the results of PCR test. In order to streamline the process, the provincial government has issued a circular to its subordinate agencies to determine the priority level of swab collection.

## Information regarding the confusion on amnesty being given by UAE and revoked visa

Those individuals whose resident visa, tourist visa and visit visa expired from **March 1**, their visas will be automatically extended **until 31 May**. Click in the link to know about your visa.

<https://smartservices.ica.gov.ae/echannels/web/client/default.html#/fileValidity>

Similarly, those individuals whose visas expired before **March 1** will also be allowed to return to their home country without paying the penalty. The ones who ran from the companies will also receive this benefit. This provision will be effective until **18 August 2020**. The following procedures have to be followed for this:

**Resident Visa** - Go to the airport directly with air ticket and passport or travel document

**Tourist Visa or Visit Visa** - Can reach the airport 6 hours earlier in Sharjah, Abu Dhabi and Ras Al Khaimah whereas should reach the airport 48 hours earlier in Dubai for clearance.

The ones using Dubai Airport should reach the Al Qusais (**Al Qusais Police Station**) Terminal 2 before 48 hours and get the clearance.

If the visa has expired after March 1, it's evident the visa won't extend until December. So, those individuals can use amnesty and need to return to the home country before **18 August 2020**.

**World Bank**  
**28.7M USD**  
**IMF**  
**130.9M USD**  
**European Union**  
**82M USD**

## Spent

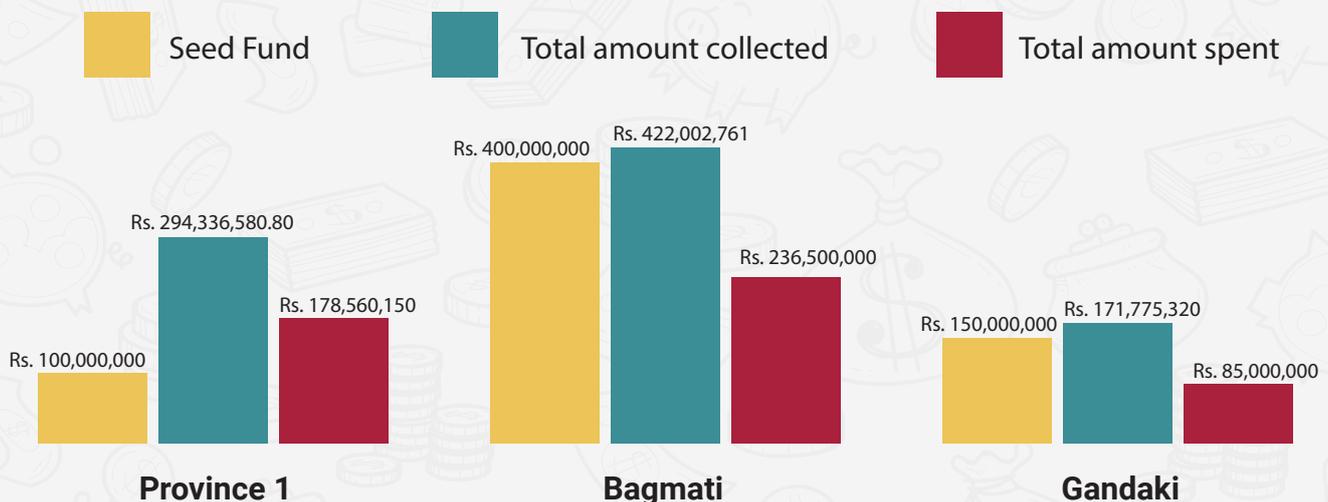

The total expenditure of Nepal government's activities against Coronavirus  
**Around 1.8B NRS**

The Ministry of Defence for the purchase of health equipment to prevent and control COVID-19 released  
**Around 2.34B NRS**

## Provincial Government

Province Names	Province 1	Province 2	Bagmati Province	Gandaki Province	Province 5	Karnali Province	Sudurpaschim Province
<b>Total Amount</b>	Around <b>293M NRS</b>	Around <b>610M NRS</b>	Around <b>400M NRS</b>	Around <b>150M NRS</b>	Around <b>236M NRS</b>	Around <b>500M NRS</b>	Around <b>402M NRS</b>
<b>Spent Amount</b>	Around <b>178M NRS</b>	Around <b>177M NRS</b>	Around <b>123M NRS</b>	Around <b>92M NRS</b>	Around <b>136M NRS</b>	Around <b>132M NRS</b>	Around <b>201M NRS</b>

## Total funds gathered and spent in Province 1, Bagmati and Gandaki

The above data shows that even the Province 1 has one of the highest number of active COVID-19 cases, the funds they have allocated internally (seed fund) is very low compared to Bagmati and Gandaki, both of which have very low active cases. This shows that the provincial government there is in dire need of support from the federal government and external organisations. The amount spent by these provinces seem to be on track with their necessities but the details were still unavailable.

*Note: This information is not complete. It has been brought together from different sources available. We will keep collecting the data and revise it in the days ahead.*

# Management of Nepali migrants returning from India during the lockdown

Democracy Resource Centre Nepal (DRCN) has published an update on the measures taken by three levels of government to prevent and control transmission of COVID-19 by interviewing various stakeholders via phone, analyzing official documents and media monitoring. The update discusses the various challenges faced and efforts made to manage the volume of migrants returning from India, focussing in the following headings.

- 01 Thousands of Nepali migrants returning everyday
- 02 Management of migrants who have entered Nepal
- 03 Quarantine operation and management after the influx
- 04 Safety of migrants in quarantine facilities
- 05 Testing facilities and material supply
- 06 Cooperation among three levels of government

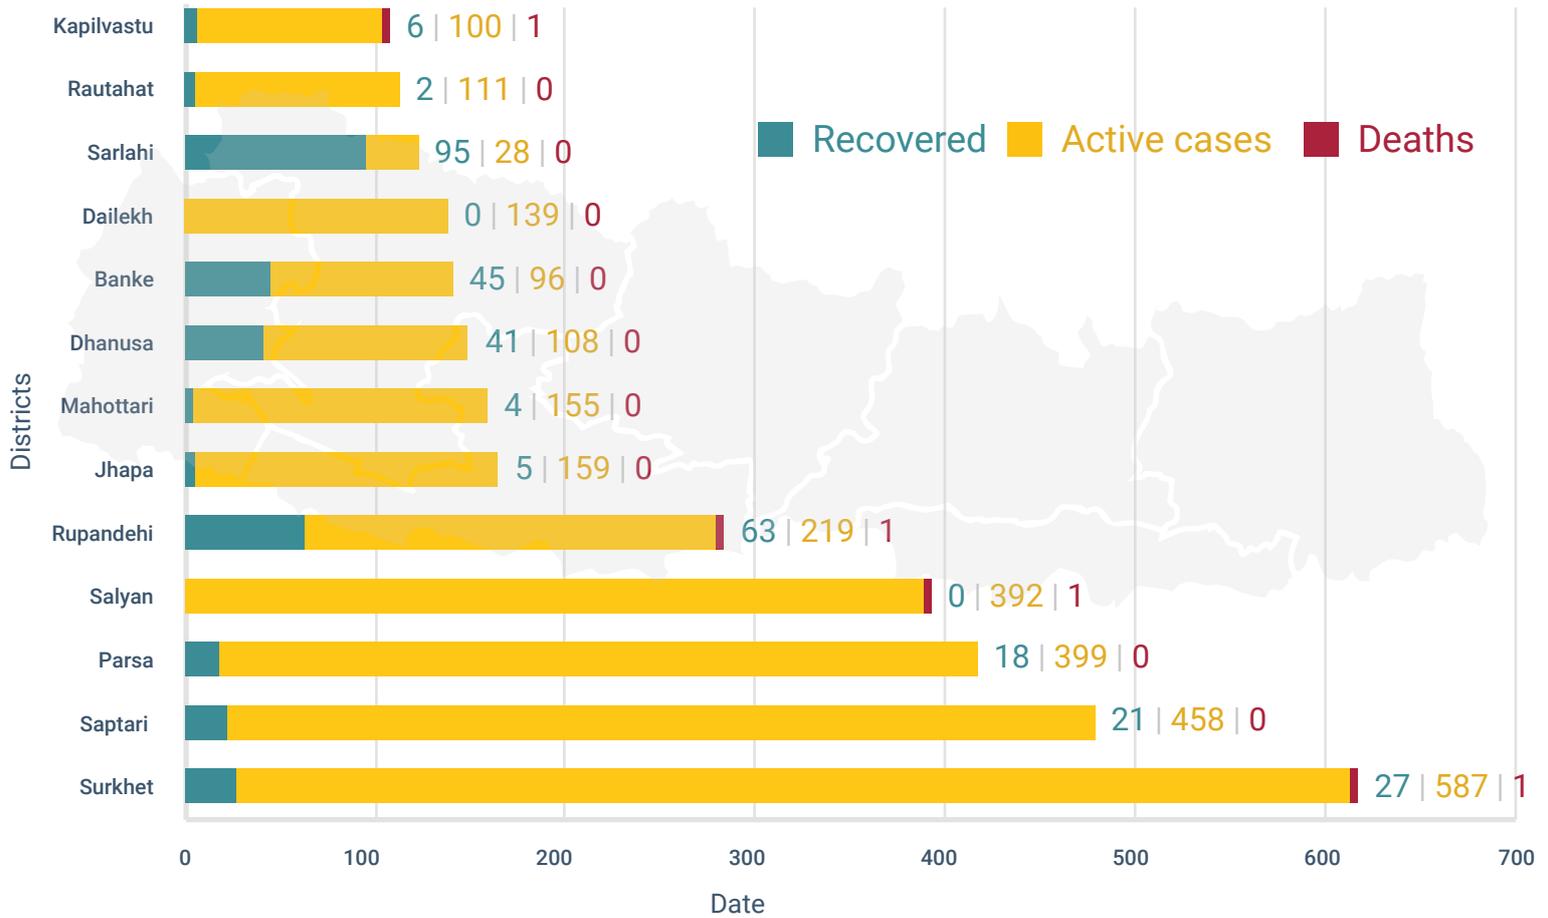

The federal and provincial governments must without delay take upon the responsibility of quarantine management. If the entire responsibility of managing citizens staying in quarantine facilities after returning from India is left to local units alone and if testing continues to happen at the present sluggish rate, the infection may spread at an uncontrollable rate.

# Nepal shows very low risk in other areas of the country compared to selected districts

## Districts having over 100 cases of Covid-19 in Nepal

The above graph shows the lists of districts with more than 100 COVID-19 cases. These 13 districts constitute 76.4 percentage of the total active cases in Nepal. What this means is that the majority of Nepal has very low risk of infection compared to these areas. As the government is now heading towards loosening the lockdown modality, with proper measures, regular activities can be safely resumed to relieve the country's economy.
